SECOND TO NONE

EXPERIENCE  
THE JOURNEY  
AT TIKKA.FI

# TIKKA ANTHEM

Nature always has the upper hand.

You aren't as fast as animals and you can't see as far and clear as they do.

The animal smells and hears you before you even know they're there.

You have to learn their ways.

You have to outthink the animal you're hunting by knowing where they come from and anticipate where they are going.

You can do everything right and still fail.

Even the best hunter can end up empty-handed.

But you're the hunter. There's something you can do. You can never give up.

Those who succeed, never turn back.

You can keep going.

You can create the right place and the right time.

Because you know what every Tikka shooter knows: That you can trust your rifle.

You can be confident it will handle the same forces that you can.

Whatever the situation or circumstance, all you have to do is concentrate on your shot.

Your Tikka rifle is the ultimate tool for accuracy.

Tikka is second to none.

# TIKKA 2021 - NEVER COMPROMISE

2021 is the year when we celebrate our past successes and then once again turn our attention into the future.

Tikka has a long legacy and the Tikka rifles have played an important role in Sako's now 100-year-long story. The first-ever Tikkakoski factory was established in 1893 in Jyväskylä, Finland and the factory started manufacturing gun components as early as 1918. Tikkakoski Oy and Sako cooperated on a prototype rifle series in 1981 and the rest is history: the milestone of the millionth Tikka rifle produced was reached in the 2020.

Building on Sako's 100-year-long firearm manufacturing tradition, Tikka is able to meet the requirements of modern hunters by combining traditional gunsmith know-how with advanced technology. The results are truly Second to None.

Have a look at these pages to see what we have accomplished so far and be prepared to define the future together. Welcome to the world of Tikka!

## MADE IN FINLAND

Revered all over the world.

All Tikka rifles are engineered and manufactured by Sako, in Finland. We take pride in our products and deliver what we promise. Every Tikka rifle has to group three shots under one inch at a distance of 100 m prior to being sold anywhere. Tikka rifles are both innovative and durable, but most importantly, they can be relied on under any circumstances.

A rifle comes with a purpose – to successfully hit the target. When it comes to accuracy and performance, Tikka is second to none.

# TIKKA IS SECOND TO NONE

We aim to make the best rifles in the business, rifles that are more than the sum of their parts. Designed and manufactured for ultimate accuracy and performance under any circumstance, Tikka rifles are truly Second to None.

## COLD HAMMER-FORGED BARRELS

**FOR UNPARALLELED PRECISION**  
All Tikka barrels are cold hammer forged for accuracy and ultimate durability. This method has many advantages: it ensures longer barrel life and outstanding out-of-the-box accuracy. The excellent tolerances of CHF barrels make Tikka one of the top rifle barrel manufacturers..

## REFINED BOLT ACTION

**FOR UNPRECEDENTED SMOOTHNESS**  
The silky smooth bolt operation of a Tikka is something that can't be described, it has to be experienced. The bolt always moves silently and effortlessly, providing flawless feeding from the magazine. Additionally, the surfaces of a Tikka receiver are tooled for a perfect finish ensuring maximum user comfort.

## FINE-TUNED BEDDING

**FOR ULTIMATE STABILITY**  
Excellent rifle bedding is one of the most important factors in rifle accuracy. A precise fit between the stock and the action is paramount, providing a solid foundation for long-term stock stability and a truly accurate rifle.

## PRECISE TRIGGER

**FOR EXCEPTIONALLY CRISP BREAK**  
A precisely manufactured trigger results in a crisp, clean trigger pull with a fast lock time that improves the accuracy of the rifle. A crisp trigger, manufactured according to very tight tolerances, facilitates perfect rifle trigger pull and leads to cleaner shots.

## MODULAR ECOSYSTEM

**FOR EXTENSIVE ADAPTABILITY**  
The Tikka rifle family has been on the market over 15 years, and those years haven't gone to waste. Today, we have the leading accessory ecosystem in the world and a functional after-market selection which offers spare parts to suit all needs: rifle grips, pistol grips, front grips, recoil pads, bolt shrouds and more.

NUMEROUS TARGETS, ONE SOLUTION

# TIKKA T1x MULTI TASK RIMFIRE

## BOLT

Tikka T1x has a stainless steel bolt, which offers smooth and weather resistant movement.

## SAFETY

A two-stage safety that's easy and quiet to operate and clearly indicates when the rifle is on safe or ready to fire.

## ACTION

The action shares the same bedding surfaces and inlay footprint with the centerfire T3x rifles.

## SIGHT ATTACHMENT

## BARREL

A cold hammer forged barrel with a crossover profile offers the benefits of a heavier barrel without much added weight.

## PISTOL GRIP

Compatibility with most T3x accessories makes it easy to adapt the rifle to the preferences of any shooter.

## TRIGGER

The mechanism shares the same high quality trigger unit offered in Tikka centerfire rifles for achieving maximum accuracy.

## MAGAZINE

A 10 round magazine comes as standard for both 22 LR and 17 HMR calibers. Short magazine available as accessory.

## STOCK

Light and durable stock with carefully designed grip patters for maximum comfort. From a vertical pistol grip to colored grips, the T1x stock can be fitted with most T3x accessories. The length of the stock can be increased with spacers. This allows the rifle to grow alongside the shooter.

## 22 LR CALIBER VERSION

Experience the rimfire rifle that performs perfectly at the range and in the rough.

# T1x MULTI TASK RIMFIRE

Choose a rifle that is up for the task. 22 LR and 17 HRM caliber options of Tikka T1x are best suited for target shooting and small game hunting.

The most versatile rimfire rifle on the market.

Tikka T1x rimfire rifle, with its ample 10 round magazine and high-quality trigger mechanism, can handle a variety of shooting tasks. Thanks to the cross-over profile barrel, you can enjoy the benefits and stability of a heavier barrel without noticeably increasing the weight.

Caliber options: 22 LR, 17 HMR

THE ULTIMATE TOOL FOR ACCURACY

# TIKKA T3x SERIES

## ACTION

The action is designed for accuracy, reliability and easy servicing. Tikka rifles provide you with an extremely rigid action with a two-locking lug T3 bolt. The bolt features a spring-loaded plunger ejector and a removable bolt handle, with a 70° opening angle leaving plenty of room for handling the bolt. This is one of the smoothest actions on the market.

## SAFETY

Tikka rifles provide you with a two-stage safety, blocking both the trigger and bolt handle. The safety is easy to operate and indicates when the rifle is ready for firing.

## SIGHTS

Most rifles are delivered without open sights; they are optional. Integral rails are installed on top of the receiver for Tikka's unique Optilock™ scope mounts. The receiver is also tapped for a Picatinny scope mount base.

## MAGAZINE

The single-column detachable magazines are manufactured from strong fiberglass-reinforced synthetic material. The magazine holds 3, 5, 6 or even 10 rounds depending on the model and caliber. A flush release is installed at the front of the magazine to prevent accidental releases.

## TRIGGER

A single-stage pull with a comfortable trigger feel. The steel trigger has vertical grooves for added grip, even when wearing gloves. It is easily adjustable through the magazine well from 1 to 2 kg (2 to 4 lbs).

## STOCK

The T3x stock is designed to be light and durable. Carefully engineered use of walnut or fiberglass-reinforced synthetic materials guarantee solid performance. An optional recoil pad system with spacers provides adjustability in the length of pull. Grip patterns are carefully designed for added comfort and a firm grip.

## BARREL

A cold hammer-forged Sako barrel of highest-grade steel is fastened to the receiver by a sturdy thread for safety and accuracy. Barrel is hand-crowned, as a precise and even muzzle crown is essential for accuracy.

The Tikka T3x contains the same features that have made all Tikka rifles world-famous. When you have a Tikka rifle, you know it is second to none.

## TIKKA T3x SERIES

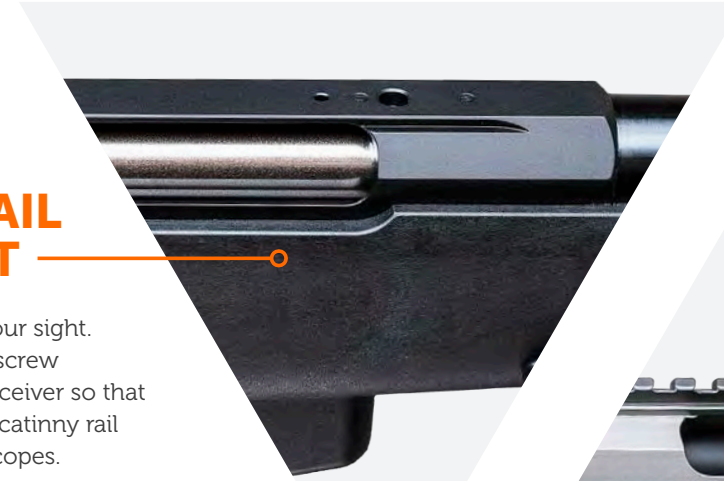

# FEATURES YOU CAN RELY ON

Tikka T3x's features provide world-class functionality and ultimate precision.

### NON-SLIP GRIP

The T3x synthetic stock has an asymmetrical grip pattern and shape that has been specifically designed to give a solid grip in all conditions.

### VERSATILE RAIL ATTACHMENT

Always keep the target in your sight. The T3x models have extra screw placements on top of the receiver so that you can robustly attach a Picatinny rail – even when using larger scopes.

### WIDENED EJECTION PORT

The T3x receiver introduces a widened angular ejection port that makes it easier to feed one cartridge at a time.

### MODULAR STOCK

T3x has a modular synthetic stock that has interchangeable pistol grips, making it possible to modify the angle of the grip. This allows for multiple shooting positions. Additional grips are sold separately.

The T3x synthetic stock also has an additional attachment point which allows you to change the width of the stock's fore-end.

### RECOIL PAD

The recoil pad technology incorporated in T3x models reduces the impact of recoil on the shooter. The robust pad allows you to fully concentrate on the accuracy of your shots.

### ROBUST BOLT SHROUD

Our T3x models come with a high-quality, durable metallic bolt shroud that covers and shields the rear of the bolt body and the firing pin.

### STOCK NOISE REDUCTION

Be as silent as the forest. All fixed T3x synthetic stocks have a foam insert within the interior of the rear stock. This lowers the stock-generated noise and can help you keep your target in sight. Not available for models with an adjustable cheek piece.

# T3x HUNTER

The Tikka T3x Hunter is designed for a shooter who appreciates the warm feel of a wooden stock combined with solid performance.

The T3x Hunter offers an extensive caliber selection for hunting and sport shooting purposes. It is built with traditional principles and modern innovation, providing you with a new level of accuracy, reliability, and enjoyment.

# T3x LAMINATED STAINLESS

Weather can change in minutes, but the accuracy and performance of this rifle last for years.

Tikka T3x laminated stainless is a weather-resistant, sharp-looking grey stock for the adventurous hunter. T3x Laminated Stainless is designed to withstand demanding weather conditions.

T3x Laminated Stainless model comes with a stainless steel barreled action and hard-laminated stock. Compared to normal wood, the laminated wood cell structure does not expand during changing weather conditions. This will minimize the change in point of impact from where the rifle was zeroed.

Caliber options: 204 Ruger | 222 Rem | 223 Rem | 22-250 Rem | 243 Win | 260 Rem | 7mm-08 Rem | 308 Win | 6.5 Creedmoor | 25-06 Rem | 6.5x55 SE | 270 Win | 30-06 Sprg | 9.3x62 | 7mm Rem Mag | 300 Win Mag | 338 Win Mag | 270 WSM | 300 WSM

# T3x COMPACT

A rifle that fits like a glove.

T3x Compact is an adjustable rifle that adapts to its user. This rifle has a 12.5" (318 mm) length of pull, creating ideal ergonomics for shooters who struggle with long stocks. It is suitable for long term use, as you can adjust the length of pull according to your needs – making it especially useful for young shooters, who can adjust it as they grow.

The calibers chosen are milder in recoil, easy to control and therefore great for training as well as for serious hunting.

Caliber options: 223 Rem | 22-250 Rem | 243 Win | 7mm-08 Rem | 308 Win | 6.5 Creedmoor

Tikka T3x Compact comes with a 30 mm (approx. 1") spacer and larger recoil pad to enable a longer length of pull.

# SET TO BEAT THE WEATHER

No snow or ice, no mud or rain, no gravel or dust – nothing can prevent you from successfully hitting the target. Your Tikka rifle has the same pinpoint accuracy and performance in all conditions, anywhere in the world.

# T3x VARMINT

If you're looking for a true stalking or long distance tool, look no further.

T3x Varmint has consistent accuracy, be it at the range or on the plains. The free-floating barrel of the Tikka T3x Varmint effectively eliminates vibration, offering solid accuracy performance, round after round. The synthetic T3x Varmint stock comes with a vertical pistol grip, better suited for prone shooting.

The stock has an extra wide fore-end for more solid support, and the swivel stud accommodates either a bipod or a sling. The ergonomically designed Varmint cheek piece provides a comfortable optimal head position.

All Varmint models come with the standard of a 5- or 6-round magazine.

# T3x SPORTER

Aim for success – experience and unmatched accuracy.

Tikka developed this ultimate target rifle in cooperation with the Finnish Hunting and Sporting Association. This rifle is built to perform at the highest level of competition while simultaneously functioning as a hunting rifle. The rifle features a laminated stock with an adjustable cheek piece for optimal scope alignment, and an adjustable recoil pad to accommodate each shooter's personal style and ergonomics.

Caliber options: 222 Rem | 223 Rem | 260 Rem | 308 Win |

Also compatible with T3 models.

## OPTISUP SUPPRESSORS

Optisup .22 and .17 are simple and straightforward rimfire suppressors. These two models have a structure where the solid baffle construction can be easily dismantled for cleaning. The .22 version is extremely lightweight due to internal baffles that are made from a durable synthetic material. The .17 version has the same structure, but the baffles are made from aluminium.

- Removable internal baffles for easy cleaning
- Lightweight construction
- Cerakote® surface treatment for optimal weather resistance
- Two models; one for .22 and the other for .17

MODEL	WEIGHT (g)	LENGTH (mm)	DIAMETER (mm)	Bullet channel diameter / max caliber	Available Thread	SOUND REDUCTION in dB*
Optisup 17	154	220	28	7.5mm / 17HMR	1/2-20 / 1/2-28	20-29
Optisup 22	124	220	28	7.5mm / 22LR	1/2-20 / 1/2-28	19-22

We also have light weighted aluminum suppressors for larger calibers up to 308 Winchester. The surface is cerakote painted "Sniper Grey". This suppressor is available in four different muzzle threads.

- Optisup AL M14X1, Max cal. 308Win Sniper Grey
- Optisup AL M15X1, Max cal. 308Win Sniper Grey
- Optisup AL M18X1, Max cal. 308Win Sniper Grey
- Optisup AL 5/8x24, Max cal. 308Win Sniper Grey

With different types, lengths and colors of rails you can easily attach accessories on your rifle..

## MUZZLE BRAKES

Variety of muzzle brakes are available for different barrel contours and muzzle threads in stainless steel, black and cerakote colors.

## OPTILOCK™ SCOPE MOUNTS

A quality rifle deserves quality accessories. The Optilock™ scope mounts perfectly complement Sako manufactured rifles and ensure ultimate accuracy in all circumstances.

The standard Optilock™ base features an indexing edge that makes it easier to tighten the ring without any accidental rotation. All Optilock™ bases have a brand new angular design to perfectly go along with the beauty of the rifle itself.

Optilock™ bases and adjustment rings are offered in multiple different lengths and sizes. This allows for a multitude of different scope sizes and brands to be fitted onto Sako rifles.

All our scope mounts are made from extremely strong material and they are designed specifically to provide a robust scope mount for the demanding user. A variety of different heights and ring sizes ensures that there's a perfect option for every shooter. The Optilock™ mounts keep the scope aligned and secured during all circumstances. The scope is mounted with the revolutionary ball-bearing rings. Unlike conventional mounts, the Optilock's polymer rings evenly distribute the clasp force along the shaft of the scope, protecting your optics. The limiter pin in the mount base and the limiter pin slot on the receiver enable fast, secure and accurate mounting of the scope.

## NEW FOR OPTILOCK™

Newest addition to the Optilock family is the quick release (QR) bases and rings to ensure fast exchange of scope.

### OPTILOCK™ QR BASE PAIRS

- Sako short base pair
- Sako long base pair
- Tikka base pair

### OPTILOCK™ QR RING PAIRS

- 1" ring pair (low, medium and high)
- 30mm ring pair (low, medium and high)
- 34mm ring pair (low and medium)
- 36mm ring pair (low)

Rings of different height and diameter are available (please see data table on our Tikka website). This allows for adjusting sights to suit each shooter and scope model.

**OPTILOCK™**

## PICK THE RIGHT OPTILOCK COMBINATION

There's a selection table in Optilock™ packages. This ensures it's easy to find the correct base and ring combination for your exact needs. More info at [sako.fi](http://sako.fi)

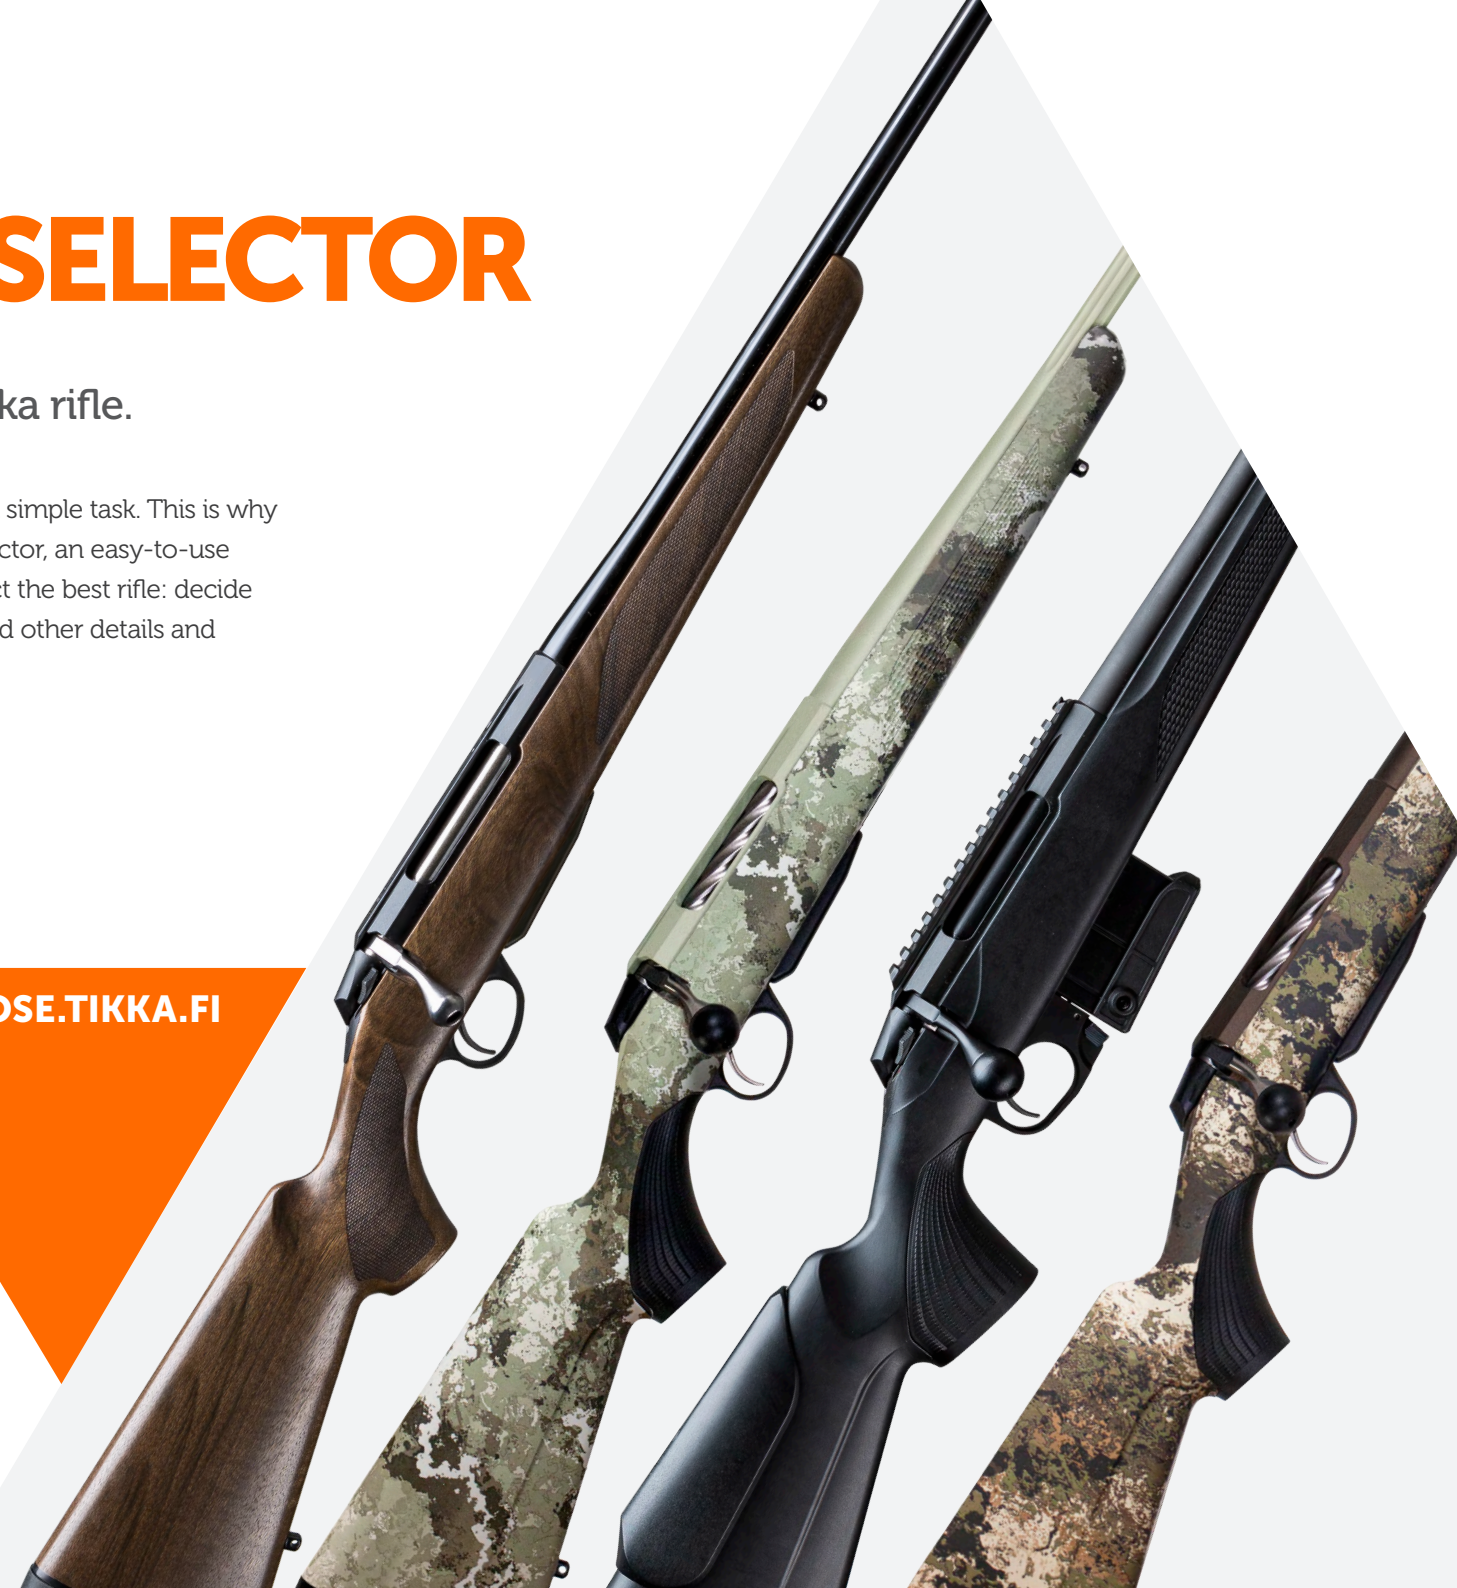

The front base of the Optilock™ has a limiter pin for the receiver's surface in front. This ensures correct remounting of the scope and Optilock™ unit, without requiring new sight adjustments if the unit is removed and repositioned.

# TIKKA SELECTOR

Select the right Tikka rifle.

Finding the right rifle is never a simple task. This is why we have created the Tikka Selector, an easy-to-use online tool to help you to select the best rifle: decide between the calibers, sights and other details and compare the specs.
